PRODUKTBESKRIVELSE

TASKMASTER® TM8500 INLINE

TASKMASTER® inline spildevandskværn anvender en kraftig dobbeltakselmekanisme og CUTTER CARTRIDGE®-teknologi til at reducere faste stoffer i rørledningssystemer. Disse alsidige processorer neddeler klude, plastik, træ, tamponer, hygiejnebind og mere. De er uvurderlige i anlægsdrift verden over, holder systemerne flydende, reducerer pumpens nedetid og beskytter afvandingsudstyr, såsom centrifuger, filterpresser og mere.
